Capital Bancorp Reports Record Third Quarter 2019 Earnings

Increases in Net Interest Income and Noninterest Income contributed to a 42% year-over-year increase in Net Income

Rockville, Maryland, October 22, 2019 (GLOBE NEWSWIRE) – Capital Bancorp, Inc. (the "Company") (NASDAQ: CBNK), the holding company for Capital Bank, N.A. (the "Bank"), today reported net income of \$4.5 million, or \$0.32 per diluted share, for the third quarter of 2019. By comparison, net income was \$3.1 million, or \$0.26 per diluted share, for the third quarter of 2018. Return on average assets was 1.42% and return on average equity was 14.04% for the third quarter of 2019.

"The third quarter saw continued robust growth in commercial loans and deposits. Despite fierce competition and a declining rate environment, our margin remained stable, which is a testament to our solutions-driven approach, sales discipline and quality hirings. The mortgage and credit card businesses continue to experience higher than anticipated growth and profits to complement and enhance the commercial franchise," said Ed Barry, CEO of Capital Bancorp.

2019 Third Quarter Highlights

- **Record Net Income** - Net income for the third quarter of 2019 increased 11% to \$4.5 million compared to \$4.0 million for the second quarter of 2019. Diluted earnings per share for the three months ended September 30, 2019 was \$0.32, compared to \$0.29 per share for the three months ended June 30, 2019. Return on average assets was 1.42%, an increase of 3 basis points compared to the second quarter of 2019. Return on average equity for the third quarter of 2019 was 14.04%, compared to 13.23% for the previous quarter.
- **Robust Loan Growth** - For the quarter ended September 30, 2019, total loans increased \$84.0 million, or 8%, to \$1.14 billion compared to \$1.06 billion at June 30, 2019. Loans increased year over year with growth of \$184.9 million, or 19%, from \$955.4 million at September 30, 2018. Average loan balances have increased 15% year over year, with the largest growth from residential real estate and commercial loans.
- **Strong Core Deposit Growth and Improving Deposit Profile** - The Company continues to execute on its strategic initiative to improve the deposit portfolio mix away from wholesale time deposits. Accordingly, at September 30, 2019, noninterest bearing deposits increased by \$13.9 million, or 20% annualized, compared to June 30, 2019. The growth was partially driven by a 5% increase in OpenSky® deposits of \$4.0 million for the three months ended September 30, 2019. Noninterest bearing deposits increased 25% to \$293.4 million at September 30, 2019, compared to \$234.1 million at September 30, 2018. The cost of interest bearing deposits declined 1 basis point to 1.83% compared to the second quarter of 2019, and the cost of borrowed funds decreased 39 basis points to 3.19% due to in part to two market rate decreases in the third quarter.
- **Stable Net Interest Margin** - The net interest margin improved 4 basis points to 5.83% for the third quarter of 2019 compared to the prior quarter, and increased 27 basis points from 5.56% in the same quarter of the previous year. The quarter over quarter increase this year was primarily

due to an increase in loan yield. Excluding credit card loans, the net interest margin remained flat for the three months ended September 30, 2019 at 4.37% compared to the prior quarter, and increased from 4.26% in the same quarter of 2018.

- **Credit Card Issuances Continue at a Record Pace** - OpenSky® credit card issuances continue at higher levels with new originations for the quarter totaling 31,400, compared to 36,700 in the prior quarter due to seasonal factors. New originations increased 11,700, or 59%, from 19,700 in the third quarter of 2018. Our enhanced customer application and improved mobile servicing functionality contributed to an increase in customer accounts of approximately 52,000, or 30%, from September 30, 2018, and exceeded 220,000 at September 30, 2019.
- **Profitable Mortgage Business** - The Bank's residential mortgage banking division increased the number of loans originated by 40% compared to the previous quarter, and continued to contribute to the Company's results of operations for the quarter with higher gains on sales. The decline in gain-on-sale margin during the third quarter is attributable to the large increase in price sensitive refinance activity driven by the lower rate environment.
- **Sound Asset Quality** - Non-performing assets as a percentage of total assets decreased to 0.51% at September 30, 2019, compared to 0.57% at June 30, 2019, and increased 9 basis points from 0.42% at September 30, 2018. The quarterly decrease is due to a reduction of non-performing loans of approximately \$302 thousand. The increase from the previous year is attributable to a single borrower relationship totaling \$2.1 million that is well secured, on which no impairment is expected. As such, there have been no losses related to this increase in non-performing assets. Net charge-offs for the nine months ended September 30, 2019 were \$369 thousand, a decrease from \$781 thousand for the same period last year.

Net interest margin increased 27 basis points to 5.83% for the three months ended September 30, 2019 from 5.56% for the three months ended September 30, 2018. For the three months ended September 30, 2019, our average interest-earning assets increased by \$202.3 million, or 20%, compared to the three months ended September 30, 2018, and the average yield on our interest-earning assets increased by 48 basis points. In comparison, our average interest-bearing liabilities increased \$117.0 million, or 16%, from the third quarter of 2018 to the third quarter of 2019, with the respective average rate increasing by 35 basis points.

Strong loan growth during the three months ended September 30, 2019 led to a provision for loan losses of \$1.1 million, compared to \$495 thousand during the three months ended September 30, 2018. Net charge-offs for the third quarter of 2019 were \$188 thousand, or 0.07% of average loans, annualized. Noninterest income increased by \$3.0 million, or 70% from \$4.2 million for the three months ended September 30, 2018 to \$7.2 million for the three months ended September 30, 2019, due to increased credit card fees and mortgage banking revenues.

Noninterest expense was \$18.2 million and \$13.9 million for the three months ended September 30, 2019 and 2018, respectively. The increase in noninterest expense was driven primarily by increases in salaries and benefits, which include commissions paid on mortgage originations, and to a lesser degree by increases in data processing expenses, advertising, and other operating expenses. Other operating expenses were also impacted by a \$216 thousand credit to our FDIC assessment expense in the third quarter of 2019 as a result of the FDIC Deposit Insurance Fund exceeding 1.38% of insured deposits at June 30, 2019.

Noninterest income increased by \$4.6 million, or 36% from \$12.7 million for the nine months ended September 30, 2018 to \$17.2 million for the nine months ended September 30, 2019, due largely to increased mortgage banking revenue.

Noninterest expense was \$48.8 million and \$41.0 million for the nine months ended September 30, 2019 and 2018, respectively. The increase in noninterest expense was driven primarily by increases in salaries and benefits, which include commissions paid on mortgage originations, professional fees and other expenses.
